# Responses from Magnetrol ATTACHMENT B Requests

# General Response to All Requests:

Magnetrol bought the facility in 1978. Therefore, the responses to the information requests contain information dating only from 1978.

# Response to Question No. 1:

Joseph R. Fiedler, Richard Lamz, Jim Jani, Loren Data, and Harry Klimek are Magnetrol employees who were consulted in the preparation of the answers to the information requested. They are all located at 5300 Belmont Road, Downers Grove, Illinois 60515, phone 630-969-4000. Additionally, Magnetrol consulted with its attorneys in the preparation of these responses. Any contact with Magnetrol or its employees in the future should be made through Michael J. Maher or Elizabeth S. Harvey, Swanson, Martin & Bell, One IBM Plaza, Suite 2900, 330 North Wabash Avenue, Chicago, IL 60611, phone 312-321-9100.

# Response to Question No. 2:

- ◆ Phase I Environmental Analysis of 5300 Belmont Road, October 23, 1998, for American National Bank & Trust
- ♦ Plat of Survey showing location of sewers, utilities, additions, and tanks
- ◆ Drawing of Chemical Solvent Room location
- ♦ Hazardous waste manifests
- Blueprint for the addition to manufacturing facilities
- ♦ Downers Grove Sanitary District Prohibited Materials Discharge Reports

# Response to Question No. 3:

We do not believe there is anyone alive today who could provide additional responses or documents.

# Response to Question No. 4:

Phase I Environmental Analysis of 5300 Belmont Road dated October 23, 1998 for American National Bank & Trust. (See *Attachment #1*.)

# Response to Question No. 5:

There are no monitoring wells on the property.

# Response to Question No. 6:

No soil boring has been authorized or contracted for by Magnetrol. Magnetrol is aware that the Illinois Environmental Protection Agency (IEPA) performed some soil borings along Wisconsin Avenue in fall 2001. To the best of our knowledge, those borings were performed in the parkway between Magnetrol's property and Wisconsin Avenue, and so were not actually on Magnetrol's property. Magnetrol has no further information regarding those borings by IEPA, or regarding the results of those borings.

# Response to Question No. 7:

We had two below ground storage tanks for heating oil that were removed when we converted to natural gas heat in 1987. The Downers Grove Fire Department witnessed the removal and condition of the site at that time. No samples were taken of the contents of the tanks, or of the soil around the tanks. We have a below ground propane tank, which is no longer active. That tank no longer contains propane, and was capped.

Finally, we had one Dyked Trichloretheline above ground tank that was removed in 1990. No samples were taken of the contents of the tank. In its place is a liquid Argon tank installed in December 1995. (See *Attachment #2* for locations.)

# Response to Question No. 8:

No records exist for Magnetrol's solvent management system prior to 1980. To the best of our knowledge, prior to 1980, Trichloroethylene and Trichloroethane were purchased in 55-gallon drums from Baron Blakeslee and stored in the building's chemical solvent room. The solvent was used in a degreaser located in the production area of the building. Solvent was transported to the machine and then placed into it. When the solvent was spent, the solvent was removed and placed into 55-gallon drums. The spent solvent was then transported and placed in the building's chemical solvent room to await removal by Baron Blakeslee. (See *Attachment #3* for location.)

# Response to Question No. 9:

No records exist for Magnetrol's waste solvent handling system prior to 1980. All spent solvent was removed from the premises by the supplier of the solvent. Trichloroethane and Trichloroethylene were the solvents used. These two solvents were purchased in 55-gallon drums. The drums were stored in the chemical solvent room, until the solvent was used in production. Spent Trichloroethane and Trichloroethylene were transferred from the machine into 55-gallon drums and stored in the chemical solvent room until removal by the supplier of the solvents. The only company used for both the purchase and the disposal of the two solvents was Baron Blakeslee.

# Response to Question No. 10:

Magnetrol has not purchased products containing solvents since prior to 1995. Purchase Order records (i.e., the actual paper Purchase Order) establishing the names, years of service, and quantities of solvents received, are not available. Purchase Orders are destroyed after five years. In some limited circumstances, computer records exist.

Magnetrol believes that Baron Blakeslee was the only supplier of the Trichloroethylene and Trichloroethane when those solvents were used. As noted above, Magnetrol stopped using these solvents prior to 1995. Quantities received are unknown, except to the extent that disposal manifests indicate quantities transported for disposal. Magnetrol no longer does business with Baron Blakeslee; it was located in Pulaski, Tennessee, with a phone number of 931-363-4130.

1 .

Page 2 of 3

Trichlorotrifluoroethane (Freon) was purchased from Detrex Corporation (2537 Le Moyne Street, Melrose Park, IL 60160). Based on limited available records, Freon was purchased from Detrex Corporation in the amount of 330 gallons during the period of September 19, 1991 to May 28, 1992.

# Response to Question No. 11:

See Attachment #4 (hazardous waste manifests) for answers to question 11. We have information from 1980 forward until we stopped using solvents for degreasing (prior to 1995).

# Response to Question No. 12:

See Attachment #5 (blueprint).

# Response to Question No. 13:

See Attachment #6 (Downers Grove Sanitary District reports).

# Response to Question No. 14:

Floor drains are used only for emergency purposes, such as a roof leak or a water main break. Those drains are connected to the sanitary sewer system. Locations of the drains are shown on *Attachment #5* (blueprint).

PHASE I ENVIRONMENTAL ANALYSIS OF THE 5300 BELMONT ROAD INDUSTRIAL SITE, PART OF THE SOUTHEAST **QUARTER OF SECTION 12, TOWNSHIP 38** NORTH, RANGE 10 EAST, DOWNERS GROVE, LISLE TOWNSHIP, DUPAGE COUNTY, ILLINOIS.

October 23, 1998

Prepared for: American National Bank & Trust Company of Chicago 11 32 Willowbrook, Illinois

October 23, 1998

Mr. Larry Dolosic, Vice President American National Bank & Trust Company of Chicago 900 75th Street Willowbrook, Illinois 60521

Dear Mr. Dolosic:

Attached is a copy of the Phase I Environmental Assessment for the property known as 5300 Beimont Road, Downers Grove, DuPage County, Illinois. We have personally inspected the property, reviewed records and interviewed knowledgeable people concerning this site. On the basis of observations, record searches and interviews, a Phase II study is not recommended for this site; however, the following housekeeping issues should be addressed:

- The hazardous material storage room, located in the southwest corner of the building, has oil saturated absorbent material and liquid on the floor. Staining was noted on the northwest portion of the floor, near the rolling door. Based on the current configuration of the hazardous storage room, if a spill were to occur, it could flow out of or beneath the rolling door. It is recommended that precautions be taken to control any liquids from flowing out of the building, if a spill were to occur.
- A silver recovery system is used for the photo developing unit in the marketing room and in the print shop. The silver recovery system for the print shop is located in the boiler room. The current system is three buckets stacked near a floor drain. It is recommended that a more secure silver recovery system, which is located away from a floor drain, be used.
- Older pipe wrap was noted through out the original portion of the building; the pipe wrap
  appeared in good condition. Nine inch floor tile was located in the print shop area of the
  subject building; the nine inch floor tile is highly coated and well maintained. No asbestos
  samples were taken; a licensed asbestos abatement specialist should be retained to do a full

i

asbestos survey, and an asbestos management plan should be implemented for any asbestos materials within the facility.

• A liquid (most likely water) was observed discharging from the southwest side of the building. According to Mr. Klimek, production manager for Magnetrol, and Green observation, the liquid is discharging from a water fountain. Because the liquid is discharging to the outside, this may be a violation of the Clean Water Act. It is recommended that the configuration of the fountain be changed.

The subject site has been occupied by Magnetrol, a manufacturer of level and flow controls, from 1960 to the present. Two additions have been constructed to the subject building since 1960. The overall site is well kept. The only spills or staining noted was on the afore mentioned hazardous materials floor, and minor staining was noted on the floor of the machine shop.

A 1,1,1 Trichloroethylene (TCE) degreaser was formerly used on the subject site; this system had a 500 gallon tank associated with it. No staining or concrete deterioration was noted on the floor in the location of the former degreaser. The epoxy painted floor has a high degree of integrity with no cracks or nearby floor drains. The former degreaser does not appear to have posed a significant environmental risk to the subject site. No further investigation is warranted at this time.

Two 8,000 gallon underground heating oil tanks were formerly located in the current location of the garage, on the north side of the building. These tanks were removed in 1987 when the garage and atrium were constructed. According to Mr. Klimek, no staining was noted when the tanks were removed; however, there was no documentation available. An FOI was filed with the City of Downers Grove; these files have not yet been received.

One nearby LUST site across Wisconsin Avenue has received closure with the Illinois EPA and should not pose a threat to the subject site. There are a number of hazardous waste generators, two TRI reporters, two CERCLIS sites, and two NIPC solid waste site in the vicinity of the subject site, including one immediately adjacent site that use large quantities of chilorinated

solvents. Given the groundwater flow north toward a nearby creek, the subject site is up or cross gradient from these sites. None of these sites should pose a significant adverse risk to the subject site.

The property does not fall under the provisions of the Illinois Responsible Property Transfer Act, if a transfer is made. From the field inspections and interviews with knowledgeable persons, underground tanks subject to registration at the State Fire Marshal's Office are no longer present. The site is currently listed as a large quantity hazardous waste generator; however, Magnetrol does not operate under this level of hazardous waste generation. According to Mr. Klimek, Magnetrol generates less than 1,000 kg. of waste per month. According to Mr. Jim Jini, Environmental Director for Magnetrol, hazardous materials are not currently used in quantities which would be subject to reporting under SARA Section 313. The subject site is not within a floodway, or designated floodplain.

True copies of this report are signed and sealed on this page and on page 30 of the report.

Sincerely,

William W. Frerichs, REPA

PHASE I ENVIRONMENTAL ANALYSIS OF THE 5300 BELMONT ROAD INDUSTRIAL SITE, PART OF THE SOUTHEAST QUARTER OF SECTION 12, TOWNSHIP 38 NORTH, RANGE 10 EAST, DOWNERS GROVE, LISLE TOWNSHIP, DUPAGE COUNTY, ILLINOIS.

# Conclusion:

On the basis of observations, record searches and interviews, a Phase II study is not recommended for this site; however, the following housekeeping issues should be addressed:

- The hazardous material storage room, located in the southwest corner of the building, has oil saturated absorbent material and liquid on the floor. Staining was noted on the northwest portion of the floor, near the rolling door. Based on the current configuration of the hazardous storage room, if a spill were to occur, it could flow out of or beneath the rolling door. It is recommended that precautions be taken to control any liquids from flowing out of the building, if a spill were to occur.
- A silver recovery system is used for the photo developing unit in the marketing room and in the print shop. The silver recovery system for the print shop is located in the boiler room. The current system is three buckets stacked near a floor drain. It is recommended that a more secure silver recovery system, which is located away from a floor drain, be used.
- Older pipe wrap was noted through out the original portion of the building; the pipe wrap appeared in good condition. Nine inch floor tile was located in the print shop area of the subject building; the nine inch floor tile is highly coated and well maintained. No asbestos samples were taken; a licensed asbestos abatement specialist should be retained to do a full asbestos survey, and an asbestos management plan should be implemented for any asbestos materials within the facility.
- A liquid (most likely water) was observed discharging from the southwest side of the building. According to Mr. Klimek, production manager for Magnetrol, and Green observation, the liquid is discharging from a water fountain. Because the liquid is discharging to the outside, this may be a violation of the Clean Water Act. It is recommended that the configuration of the fountain be changed.

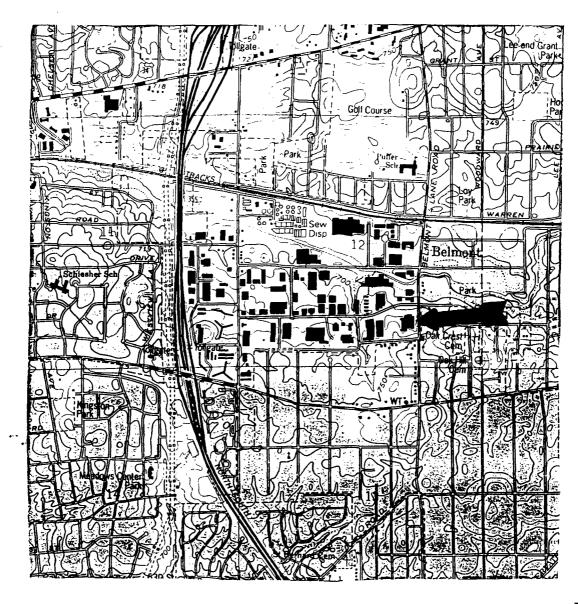

The subject site has been occupied by Magnetrol, a manufacturer of level and flow controls, from 1960 to the present. Two additions have been constructed to the subject building since 1960. The overall site is well kept. The only spills or staining noted was on the afore mentioned hazardous materials floor, and minor staining was noted on the floor of the machine shop.

A 1,1,1 Trichloroethylene (TCE) degreaser was formerly used on the subject site; this system had a 500 gallon tank associated with it. No staining or concrete deterioration was noted on the floor in the location of the former degreaser. The epoxy painted floor has a high degree of integrity with no cracks or nearby floor drains. The former degreaser does not appear to have posed a significant environmental risk to the subject site. No further investigation is warranted at this time.

Two 8,000 gallon underground heating oil tanks were formerly located in the current location of the garage, on the north side of the building. These tanks were removed in 1987 when the garage and atrium were constructed. According to Mr. Klimek, no staining was noted when the tanks were removed; however, there was no documentation available. An FOI was filed with the City of Downers Grove; these files have not yet been received.

One nearby LUST site across Wisconsin Avenue has received closure with the Illinois EPA and should not pose a threat to the subject site. There are a number of hazardous waste generators, two TRI reporters, two CERCLIS sites, and two NIPC solid waste site in the vicinity of the subject site, including one immediately adjacent site that use large quantities of chlorinated solvents. Given the groundwater flow north toward a nearby creek, the subject site is up or cross gradient from these sites. None of these sites should pose a significant adverse risk to the subject site.

The property does not fall under the provisions of the Illinois Responsible Property Transfer Act, if a transfer is made. From the field inspections and interviews with knowledgeable persons, underground tanks subject to registration at the State Fire Marshal's Office are no longer present. The site is currently listed as a large quantity hazardous waste generator; however, Magnetrol does not operate under this level of hazardous waste generation. According to Mr. Klimek, Magnetrol generates less than 1,000 kg. of waste per month. According to Mr. Jim Jini, Environmental Director for Magnetrol, hazardous materials are not currently used in quantities which would be subject to reporting under SARA Section 313. The subject site is not within a floodway, or designated floodplain

# I. BACKGROUND INFORMATION

# 1. STUDY OBJECTIVE:

The primary objective of this study is to provide a Phase I environmental assessment of the subject property to determine:

- 1. Potential prior contamination of the site that may have associated liabilities.
- 2. Whether, asbestos or other noisome or hazardous materials are present in quantities or conditions that warrant corrective action to reduce environmental liabilities.
- 3. Examine the applicability of the Illinois Responsible Property Transfer Act of 1988 with respect to this Property.
- 4. Provide written analysis of the finding of record searches which will be limited to search of the following public records: the State Fire Marshal, local fire department, USEPA, Illinois EPA, public health department and tract book searches, (Searches) and field inspections in a form that will allow informed decisions to be made.

# 2. APPROACH

A site inspection was conducted on September 30, 1998 by William Frerichs and Jessica Irwin of the Green Environmental Group. Mr. Harry Klimek, Production Manager, and Jim Jini, Environmental Director of Magnetrol, were interviewed on the day of the site visit. A file and document review was conducted to assess possible problems on the property. A search was made for potential Superfund sites, sanitary landfills, and hazardous waste generators within the near vicinity of the site to assess possible external sources of contamination that may affect the property. A determination of whether the Illinois Responsible Property Transfer Act (IRPTA) applies to this property was made on the basis of the record searches and property inspection. This determination is not intended to be a legal interpretation.

# 3. PROPERTY DESCRIPTION

# A. Location

The address is 5300 Belmont Road, Downers Grove, Illinois, 60515-4226. The site is located on the south side of Wisconsin Avenue, west side of Belmont Avenue, and ¼ mile north of Maple Avenue. Inverness Road is located adjacent to the south of the subject site. The subject property is located on the west side of the City of Downers Grove. The site is approximately 1 mile east of the I-88 Toll Way and ¼ south of St. Joseph Creek.

The property is located in the Southeast ¼ of Section 12 of Township 38 North, Range 10 East (Lisle Township) in DuPage County, Illinois

# **B.** Legal Description

PARCEL 1: LOTS 15 AND 16 IN ELLSWORTH PARK, UNIT NO. 3, A SUBDIVISION OF PART OF THE SOUTH ½ OF SECTION 12, TOWNSHIP 38 NORTH, RANGE 10 EAST OF THE 3<sup>RD</sup> PRINCIPAL MERIDIAN ACCORDING TO THE PLAT THEREOF RECORDED DECEMBER 26, 1958 AS DOCUMENT 907360 AND CORRECTED BY TWO CERTIFICATES IF CORRECTIONS RECORDED JANUARY 21, 1959 AS DOCUMENT 90986 AND RECORDED AUGUST 7, 1959 AS DOCUMENT 934617, RESPECTIVELY IN DUPAGE COUNTY, ILLINOIS.

PARCEL 2: LOT 1 IN HE 1<sup>ST</sup> ADDITION TO LOT 16 OF ELLSWORTH PARK UNIT NO. 3 OF PART OF THE SOUTHEAST 1/4 OF SECTION 12, TOWNSHIP 38 NORTH, RANGE 10 EAST OF THE 3<sup>RD</sup> PRINCIPAL MERIDIAN ACCORDING TO THE PLAT THEREOF RECORDED AUGUST 7, 1959 AS DOCUMENT 934616, IN DUPAGE COUNTY, ILLINOIS.

The Property Index Number for the site is: 08-12-409-005

# C. Physical Description

The property consists of a 72,000 square foot metal sided, brick and block industrial building situated on approximately 8.5 acres of land. The front of the building (north side) is landscaped with grass, flag poles, flowers, bushes, and trees. A garage is located west of the main entrance;

this was the former location of two 8,000 gallon underground heating oil tanks. Asphalt paved parking lots are located on the north, west, and east sides of the building. Two at-grade loading docks are located on the south and east sides of the subject building. An asphalt paved drive accesses the site from Wisconsin Ave (north) and Belmont Road (east). The southern portion of the site is bermed. There are three pole-mounted transformers on the east side of the subject site. A hazardous materials storage area is located at the southwest corner of the building.

Offices for the subject site are located at the northern portion of the building; approximately 35,000 square feet of the building is office space. The office area is environmentally uneventful. Magnetrol is the current occupant of the building. The manufacturing portion of the building is in the southeast portion of the building. Old pipe wrap is located in the original portions of the building; the pipe wrap appears in good condition. A print shop is located in the northwest portion of the building. Two above grade loading docks are located in the southeast portion of the building.

The following table summarizes environmentally significant portions of the building:

Label on interior map	Current use	Location in the huilding	Potential hazardous materials? Environmental concerns?	
M. S.	Marketing room (photo developing)	Northeast	Photo developing unit/silver recovery system	
Switch assembly dept.	Switch assembly	Northeast	Mercury- encased in glass tubes	
Weld Shop	Welding	South center	Argonne gas used	
Shipping dock	dock	East	Plastic aboveground tanks of Polymeric isocyanate(diphenylmethane diisocyanate)	
Machine shop	Punch machine	Southeast	Minor oil staining around the base of machines Chemicals for cleaning machines	
Dock	Receiving dock	South	Helical Screw air compressor	
Electronic Assembly	Assembly of PC boards	Southwest	Lead dross generated Former location of a Freon degreaser for the PC boards (one gallon tank)	

5300 Belmont Road, Downers Grove, Illinois, Phase I Environmental Assessment

Label on interior map	Current use	Location in the building	Potential hazardous materials? Environmental concerns?	
Paint booth	Paint booth and degreaser	Southwest  Paint Booth Alkaline (Al- + H20) Degreaser (for location of 1,1,1 TCE Vapor degreation at 500 gallon tank)		
Tank room	Testing room for products	West center	Large tanks of water are used for testing flow control system and levels	
Paint shop and Service center	Print shop and dark room	Northwest	Paints, Inks	
Boiler Room	Boilers, Sprinkler system	Northwest	Silver Collection system for Print shop (three buckets near a floor drain)	
Garage	Garage for owner	Northwest (near the atrium)	Former location of two underground 8,000 gallon heating oil tanks	
Hazardous materials storage	Garage area used for storage of hazardous materials and drums for pick-up	Southwest corner	Approximately thirty 55 gallon drums of lubricating oil, coolant/oil, bio waste, paints, and silver recovery	

# Adjacent and Nearby Uses

North: Tricon Industries (2325 Wisconsin Ave.)

South: Single Family Residential East: Single Family Residential

West: Econotemp, Inc. (5280 Belmont Road), Multi-Office Suite (2232-36 Wisconsin Avenue)

# D. Historic Use of Property

The 1904 plat map indicates that the subject site was owned by Riololell. The 1935 plat map shows that the subject property was owned by J.F. Kidwell. The 1951 plat map indicates the property as vacant land owned by Rudolph C. Ellsworth, Jr. The 1954 historic topographic map and aerial photograph indicates a farmstead on the subject site.

According to Mr. Harry Klimek of Magnetrol, the northern portion of the building was first constructed in 1960. Magnetrol, Inc. was the sole occupant of the building since its construction

in 1960. The 1962 historic topographic map indicates the existence of Wisconsin Avenue with the original subject building. Another addition was constructed in 1964 and is currently the southwest portion of the subject building. The 1967 aerial photography indicates the original building with the 1964 addition. The 1970 aerial photography shows little or no change from the 1967 aerial photograph. The 1980 aerial photography indicates the addition of the hazardous materials storage garage area. According to Harry Klimek, in 1987, the owner's garage and the atrium were added; during excavation for this addition, two 8,000 gallon underground heating oil tanks were removed. The 1990 aerial photography indicates the subject building in its current configuration.

# 4. Sources

A field inspection was conducted. Aerial photography from the Northeastern Illinois Regional Planning Commission and the Soil Conservation Service were examined.

US Environmental Protection Agency CERCLIS sites and nearby hazardous waste generators were identified and State Fire Marshal Office records on registered tanks as well as Illinois EPA records for leaking underground storage tanks were checked. The Northeastern Illinois Regional Planning Commission report on Landfills (1988) was consulted.

Downers Grove Building Department, FOI (Freedom of Information) request

**Downers Grove Fire Department** 

USEPA, FOI Files on Liberty Copper & Wire Company

Illinois EPA, FOI Files on Liberty Copper & Wire Company

Mr. Jack Sorenson, owner of Winfield Microsystems and Suburban Moving and Storage

# II. ENVIRONMENTAL ANALYSIS

# 1. OVERALL FINDINGS

The overall inspection of the property, interviews with knowledgeable persons, and inspection of aerial photography revealed no significant environmental concerns on the site; however, several housekeeping issues should be addressed. A Phase II study is not recommended.

Historic aerial photography and site records do not indicate the potential for environmental hazards on the subject property. USEPA records, and the Soil Conservation Service soil survey indicate that there are a number of hazardous waste generators, two TRI reporters, two CERCLIS sites, and one NIPC solid waste site in the vicinity of the subject site. None of these site are up gradient and do not pose a significant risk to the subject site.

# 2. SPECIFIC FINDINGS

# A. Radon

Radon sampling was not conducted for this site. Radon screening is not routinely monitored for industrial buildings.

# **B.** Asbestos

Older pipe wrap was noted in the original portions of the building; the pipe wrap appeared in good condition. No asbestos samples were taken at the subject site; however, if the pipe wrap is asbestos containing material, an asbestos management plan should be implemented. There were no other apparent asbestos containing materials noted within the building.

# C. PCB's

Three pole-mounted transformers are located on the east side of the subject building. They were not labeled as to PCB content and did not appear to be leaking. The risk from the pole mounted transformers appears low. The risk from PCB exposure to the site appears low.

# D. Lead

All painted surfaces on the subject site were in good condition. In the electronic assembly room, small amounts of lead dross is generated; however, this is shipped back to the original manufacturer for recycling. The overall risk from lead exposure at this site is low.

# E. Wells/Drywells/Septic Systems

There is no visual indication of former wells, drywells or septic systems on the subject property. The property is served by City of Downers Grove water. A floor drains, located in the basin of the shipping and receiving docks, empties to the storm sewer. In the boiler room, after going though the silver recovery system, the waste water discharges to a floor drain.

# F. Water Bodies/Flooding/Wetlands/Drainage

The subject site is not within a floodway area. The site is located in Zone "C", areas of minimal flooding, according to Flood Insurance Rate Maps of the area (FIRM Community Panel Number 170204 0005B, dated April 15, 1981).

Storm water runoff is north towards St. Joseph Creek, where the storm water is discharged. The St. Joseph Creek is located approximately ¼ mile north of the subject site flows west towards the East Branch of the DuPage River which is located approximately two miles west from the subject site.

# G. Spills

According to the ERNS database, there has been no reportable spills within a ¼ mile of the subject property.

The floors in the facility are in good condition; except for minor staining on the floor of the hazardous materials storage room and on the floor in the machine shop. The hazardous material storage room, located in the southwest corner of the building, has oil saturated absorbent and liquid on the floor. Staining was noted on the northwest portion of the floor, near the rolling door. Based on the current configuration of the hazardous storage room, if a spill were to occur, it could flow out of or beneath the rolling door. It is recommended that precautions be taken to control any liquids from flowing out of the building, if a spill were to occur.

A liquid was observed discharging from the southwest side of the building. According to Mr. Klimek, production manager for Magnetrol, and Green observation, the liquid is discharging from a water fountain. Because the liquid is discharging to the outside, this may be a violation of the Clean Water Act. It is recommended that the configuration of the fountain be changed.

# H. Tanks

There are several aboveground tanks containing water in the tank room of the subject building. An aboveground tank of Argonne gas is located on the east side of the subject building. These tanks do not appear to pose a significant risk to the subject site.

Two 8,000 gallon underground heating oil tanks were formerly located in the current location of the owners garage. These tanks were removed in 1987 when the garage and atrium were constructed. According to Mr. Klimek, no staining was noted when the tanks were removed; however, there was no documentation available. An FOI was filed with the City of Downers Grove; these files have not yet been received.

A 1,1,1 Trichlcroethylene (TCE) degreaser was formerly used on the subject site; this system had a 500 gallon tank associated with it. No staining or concrete deterioration was noted on floor in the location of the former degreaser. The degreaser is discussed in the hazardous materials section

5300 Belmont Road, Downers Grove, Illinois, Phase I Environmental Assessment of this report.

According to the March, 1998 State Fire Marshal's Office of Underground Storage Tank (UST) list and the January, 1998 Illinois EPA Leaking Underground Storage Tank (LUST) list, the following nearby tanks are registered:

# UST/LUST

Status	Name	Address No. LUS		LUST	Distance & Direction from the Subject Site
Active	Amoco Oil Co #9776	2231 Maple Street	3	1990	1/4 mile southeast
Active	Arrow Gear Co.	2301 Curtiss St.	2301 Curtiss St. 2 1993		1/4 mile northwest
Active	Burnside Construction Co.	2400 Wisconsin Ave	2		1/4 mile west
Active	Family Video Movie Club	5600 Belmont Rd	2		1/3 mile south
Active	Magnetek Inc.	2333 Wisconsin Ave.	4		⅓ mile west
Closed	Scot Inc.	2525 Curtiss St.	0		½ mile northwest
Active	Slampak Enterprises	4947 Belmont Ave.	4	1992 1996	⅓ mile northeast
Unresolved	Suburban Moving & Storage	2400 Wisconsin St.	0	1991	1/s mile northwest

The closest site is the Suburban Moving & Storage, formerly located at the 2400 Wisconsin site (which is located cross gradient from the subject building). They had a LUST incident which appears to have been closed by the State in March, 1996. Overall groundwater movement appears to be to the northwest which would reduce the potential overall impact of most of the LUST incidents near the subject site. The other sites are located down gradient or are far enough removed that they should not pose a significant risk to the subject site.

The stack unit classification of the subject area according to the "Potential of Contamination of Shallow Aquifers From Land Burial of Municipal Wastes" is Unit "E", which is "Uniform, relatively impermeable silty or clayey till at least 50 feet thick; no evidence of interbedded sand and gravel." This an area of low priority, no further action is needed if a LUST incident occurs in this unit according to Illinois HB 300 (1993). There is low risk of environmental hazards from nearby tanks if this area is confirmed to be Unit E.

# I. Hazardous Materials

Overall the building is well kept; according to Mr. Klimek and Mr. Jini, the majority of the hazardous materials generated (used oil, paint filters, expired paint, epoxy, oil/water/coolant, etc.) are picked up by a licenced waste hauler in a lab pack to be incinerated. Some hazardous materials are returned to respective manufactures for recycling.

The site is currently listed as a large quantity hazardous waste generator; however, Magnetrol does not operate under this level of hazardous waste generation. According to Mr. Klimek, Magnetrol generates less than 1,000 kg. of waste per month. According to Mr. Jim Jini, Environmental Director for Magnetrol, hazardous materials are not currently used in quantities which would be subject to reporting under SARA Section 313.

The following table summarizes current and former hazardous materials in the subject building:

Label on interior map	Current use	Location in the building	Potential hazardous materials? Environmental concerns?	
M. S.	Marketing room (photo developing)	Northeast	Photo developing unit/silver recovery system	
Switch assembly dept	Switch assembly	Northeast	Mercury- encased in glass tubes	
Weld Shop	Welding	South center	Argonne gas used	
Shipping dock	dock	East	Plastic aboveground tank of Polymeric isocyanate(diphenylmethane diisocyanate)	
Machine shop	Punch machine	Southeast	Minor oil staining around the base of machines Chemicals for cleaning machines	
Dock	Receiving dock	South	Helical Screw air compressor	
Electronic Assembly	Assembly of PC boards	Southwest	Lead paste generated Former location of a one gallon Freon degreaser for the PC boards	

5300 Belmont Road, Downers Grove, Illinois, Phase I Environmental Assessment

Label on interior map	Current use	Location in the building	Potential hazardous materials? Environmental concerns?	
Paint booth	Paint booth and degreaser	Southwest	Paint Booth Alkaline (Al- + H20) Degreaser (former location of 1,1,1 TCE Vapor degreaser with a 500 gallon tank)	
Paint shop and Service center	Print shop and dark room	Northwest	Paints, Inks	
Boiler Room	Boilers, Sprinkler system	Northwest	Silver Collection system for Print shop (three buckets near drain)	
Hazardous materials storage	Garage area used for storage of hazardous materials and drums for pick-up	Southwest corner	Approximately thirty 55 gallon drums of lubricating oil, coolant/oil, bio waste, paints, and silver recovery	

The hazardous material storage room, located in the southwest corner of the building, has an oil absorbent material saturated with liquid on the floor. Staining was noted on the northwest portion of the floor, near the rolling door. Based on the current configuration of the hazardous storage room, if a spill were to occur, it could flow out or beneath the rolling door. It is recommended that precautions be taken to control any liquids from flowing out of the building, if a spill were to occur.

Mercury is used in small quantities. The mercury is encapsulated in small glass tubes (see picture #8).

A silver recovery system is used for the photo developing unit in the marketing room and in the print shop. The silver recovery system for the print shop is located in the boiler room. The current system is three buckets stacked near a floor drain. It is recommended that a more advanced silver recovery system be used, in an area away from a drain.

An alkaline (Al- + H20) degreaser is currently used for cleaning metal in the facility. This replaced a 1,1,1 TCE vapor degreaser, formerly used on the subject site; the TCE degreaser system had a 500 gallon tank associated with it. According to Mr. Klimek, the system was enclosed, and used a chiller still. Approximately six to eight 55 gallon drums of Trichloroethylene (TCE) were emptied and replaced per year, and an additional three 55 gallon drums of TCE were

replaced in the course of each year. No staining or concrete deterioration was noted on floor in the location of the former degreaser. The epoxy painted floor has a high degree of integrity with no cracks or nearby floor drains. The former 1,1,1 TCE vapor degreaser does not appear to have posed a significant environmental risk to the subject site. The current alkaline degreaser does not

appear to pose a significant risk to the site.

A helical screw compressor is currently used on the site, no staining was noted around the compressor. According to Mr. Klimek, a piston compressor (20 HP) was used 20 years ago; the system had a blow down mechanism which washed the water down the sewer. The former use of

the piston compressor does not appear to pose a significant risk to the site.

J. Dumping

No dumping was noted on the subject site. Overall, the site is well kept. Gravel and asphalt pieces were noted on the south side of the subject site; this appears to be associated with the former farmstead on located on the subject site.

K. Release To The Environment

According the SARA 313 reporting at the Federal Level, DuPage County has a number of reporters. Two reporters located within a ¼ mile of the subject site are listed below:

Facility Name: J.L. CLARK ATLAS TUBE DIV.

Address: 2300 WISCONSIN AVE.

Parent Company: NA D&B #: NA Year: 1987 EPA Region: 05

Breakdown of releases (by chemical) follows:

Chemical Name: COPPER COMPOUNDS (Year: 1987, 1988)

500 lbs

Chemical Name: TETRACHLOROETHYLENE (Year: 1987, 1988, 1989, 1990, 1991, 1992)

Total

10,992 lbs

The Tricon site is located immediately adjacent to the west of the subject property. At the time of the site inspection, there was no evidence to indicate that the operations at this site were adversely impacting the subject site. The property's use of large quantities of tetrachloroethylene could pose a risk to the subject site. The Tricon site appears to be cross gradient of the subject site, given that

the groundwater flow is northwest, towards St. Joseph's Creek. The J.L. Clark site is located northwest and down gradient of the subject site. Neither site should pose a significant adverse risk to the subject site.

# L. Air

A paint booth, located near the degreaser, is used for touch up painting. Magnetrol uses under 5,000 gallons of paint per year. Magnetrol has no air permits.

# M. Other

There are no significant issues in regard to this site.

# 3. SURROUNDING AREA SITES

Searches of hazardous waste generators, CORRACTS and CERCLIS sites were conducted. CERCLIS sites are those sites which are being evaluated for the potential hazards. CORRACTS sites are those locations which have been ordered to undergo corrective action. The presence of CERCLIS or CORRACTS sites do not necessarily represent verified contamination. There are no CORRACTS site, or SCL (State equivalent CERCLIS list) sites within a mile radius of the subject site: There are two CERCLIS sites within a mile of the subject site; they are listed below:

# CERCLIS

EPA ID#	Name	Address	Distance & Direction from the Subject Site	Action
ILD981958382	Downers Grove Public Wells #6 and #8	Not provided	Not provided	PA1 - Higher priority, SI1 - No further remedial action planned
ILD047033188	Suburban Self Storage	2333 W. Wisconsin Avenue	½ mile west	PA1 - Lower priority, PA2 - Deferred to RCRA or NRC, SI1 - No further remedial action planned

The two city public wells have both been abandoned, according to Mr. Dave Conley at the Village of Downers Grove Public Works Department. This CERCLIS site should not pose a threat to the environmental integrity of the subject site.

The Suburban Self Storage CERCLIS site is listed due to the site being a TSD site. The site was formerly occupied by Liberty Copper & Wire Company, a manufacturer of copper electrical wire from 1960-1986. Liberty Copper was a TSD (transport, storage and disposal) site which went through storage closure for an outdoor waste storage area at the west side of the building and an indoor dock drum storage area at the northeast portion of the building. The site was put on the CERCLIS list as a result of the TSD status. The contaminated area of this site is on the west side of the building (away from the subject site). This site is located cross gradient from the subject site and does not appear to pose a significant risk to the subject site.

Below are listed the RCRA small and large hazardous waste generators within a ¼ mile of the subject site:

The subject site and a number of adjacent sites are included in this list. The subject property has had no RCRA violations. At the time of the site inspection, no evidence suggested that any of these generators are adversely impacting the subject site. The overall risk to the subject site from the presence of these generator sites is low.

Northeastern Illinois Regional Planning Commissions's (NIPC) 1988 Study: <u>Historic Inventory of Solid Waste Disposal Sites in Northeastern Illinois</u>, was also cross checked. There are two nearby sites, which are listed below.

# NIPC SOLID WASTE SITES

IEPA No.	Site Name	City	Twp	Range	Section
0430550001	Il. Dept. of Transportation	Lisle Township	38 N	10 E	SE ¼ of Sec. 2
0430300001	Philip Knierim	Downers Grove Twp.	38 N	11 E	Sec. 18

The Illinois Department of Transportation site is located one mile northeast of the subject site and does not appear to pose a significant risk to the subject site. The Philip Knierim site is located one mile southeast of the subject site and also does not appear to pose a significant risk. These sites are not up gradient from the subject site; the migration of any contaminants would not impact the subject site.

1112

# III. RECOMMENDATIONS

#### 1. APPLICABILITY OF THE RESPONSIBLE PROPERTY TRANSFER ACT

The property does not fall under the provisions of the Illinois Responsible Property Transfer Act, if a transfer is made. From the field inspections and interviews with knowledgeable persons, underground tanks subject to registration at the State Fire Marshal's Office are no longer present. The site is currently listed as a large quantity hazardous waste generator; however, Magnetrol does not operate under this level of hazardous waste generation. According to Mr. Klimek, Magnetrol generates less than 1,000 kg. of waste per month. According to Mr. Jim Jini, Environmental Director for Magnetrol, hazardous materials are not currently used in quantities which would be subject to reporting under SARA Section 313.

#### 2. OTHER ISSUES

On the basis of observations, record searches and interviews, a Phase II study is not recommended for this site; however, the following housekeeping issues should be addressed:

- The hazardous material storage room, located in the southwest corner of the building, has oil saturated absorbent material and liquid on the floor. Staining was noted on the northwest portion of the floor, near the rolling door. Based on the current configuration of the hazardous storage room, if a spill were to occur, it could flow out of or beneath the rolling door. It is recommended that precautions be taken to control any liquids from flowing out of the building, if a spill were to occur.
- A silver recovery system is used for the photo developing unit in the marketing room and in the print shop. The silver recovery system for the print shop is located in the boiler room. The current system is three buckets stacked near a floor drain. It is recommended that a more secure silver recovery system, which is located away from a floor drain, be used.

- Older pipe wrap was noted through out the original portion of the building; the pipe wrap appeared in good condition. Nine inch floor tile was located in the print shop area of the subject building; the nine inch floor tile is highly coated and well maintained. No asbestos samples were taken; a licensed asbestos abatement specialist should be retained to do a full asbestos survey, and an asbestos management plan should be implemented for any asbestos materials within the facility.
- A liquid (most likely water) was observed discharging from the southwest side of the building. According to Mr. Klimek, production manager for Magnetrol, and Green observation, the liquid is discharging from a water fountain. Because the liquid is discharging to the outside, this may be a violation of the Clean Water Act. It is recommended that the configuration of the fountain be changed.

The subject site has been occupied by Magnetrol, a manufacturer of level and flow controls, from 1960 to the present. Two additions have been constructed to the subject building since 1960. The overall site is well kept. The only spills or staining noted was on the afore mentioned hazardous materials floor, and minor staining was noted on the floor of the machine shop.

A 1,1,1 Trichloroethylene (TCE) degreaser was formerly used on the subject site; this system had a 500 gallon tank associated with it. No staining or concrete deterioration was noted on the floor in the location of the former degreaser. The epoxy painted floor has a high degree of integrity with no cracks or nearby floor drains. The former degreaser does not appear to have posed a significant environmental risk to the subject site. No further investigation is warranted at this time.

Two 8,000 gallon underground heating oil tanks were formerly located in the current location of the garage, on the north side of the building. These tanks were removed in 1987 when the garage and atrium were constructed. According to Mr. Klimek, no staining was noted when the tanks were removed; however, there was no documentation available. An FOI was filed with the City of Downers Grove; these files have not yet been received.

One nearby LUST site across Wisconsin Avenue has received closure with the Illinois EPA and

should not pose a threat to the subject site. There are a number of hazardous waste generators, two TRI reporters, two CERCLIS sites, and two NIPC solid waste site in the vicinity of the subject site, including one immediately adjacent site that use large quantities of chlorinated solvents. Given the groundwater flow north toward a nearby creek, the subject site is up or cross gradient from these sites. None of these sites should pose a significant adverse risk to the subject site. The subject site is not within a floodway, or designated floodplain.

#### 3. ATTEST

We are the environmental professionals who prepared the audit and the facts stated in the report are true and are made under a penalty of perjury as defined in Section 32-2 of the Criminal Code of 1961.

The reported analyses, opinions and conclusions are personal, unbiased, professional and limited only by the assumetions and qualifications stated herein. Compensation is not contingent upon an action or an event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

This investigation has been performed in accordance with all applicable legal requirements and in accordance with accepted practices prevailing in environmental industries. The personnel who performed the investigation are properly licensed and certified in accordance with the requirements of all federal, state and local laws, rules and regulations.

We have no present or prospective interest in the subject property or the parties involved.

Øessica A. Irwin,

**Environmental Analyst** 

Respectfully Submitted,

William W. Frerichs, Registered

APPENDIX B - QUALIFICATIONS

# The Green Environmental Group, Ltd.

William W. Frerichs, Principal, President

#### Education:

University of Wisconsin, Madison: B.S., Natural Resources, 1973 Sangamon State University: Graduate work in Public Administration Continuing Education Courses in Environmental areas

#### Professional Affiliations/Service:

DuPage County Environmental Commission
DuPage Environmental Awareness Center: Past President and Board Member
Illinois Association of Environmental Professionals
National Registry of Environmental Professionals
Society of Environmental Journalists

#### Registrations:

Registered Environmental Property Assessor (Number 1113) (Since 1990) Radon Detection Services, Illinois RNI91071 40 Hour Hazardous Incident Response Operations EPA (165.5) Training

As a principal and one citwo founders of the Green Environmental Group, Ltd, Mr. Frerichs conducts or directly oversees all land capability, site evaluation, Phase I, Phase II environmental site analyses and cleanup projects. He has conducted site assessments throughout the Midwest and trains all Green Environmental employees with site assessment responsibilities. He has served as: Deputy Chief of the Illinois Attorney General's Environmental Control Division; Manager of Research for the Illinois Department of Energy and Natural Resources (now part of the Illinois Department of Natural Resources); Manager of Regional Planning and Research for the Illinois EPA and Director of Water Quality Management Planning for the McHenry County Regional Planning Commission.

At the Attorney General's office, Mr. Frerichs conducted environmental site investigations and trained hazardous waste investigators. He assisted in developing hazardous waste enforcement policy and provided technical assistance in case development and negotiations. For the Illinois ENR, Mr. Frerichs developed hazardous waste programs and the program for the coal mining land suitability program which secured the State Geographic Information System for the State of Illinois.

Mr. Frerichs has written over 1,200 site analysis reports, published technical reports on waste management and has had over 200 columns and news stories on the environment printed in Copley Press publications. His environmental assessment reports are appreciated for their clarity. He has been an expert witness in environmental litigation and has worked closely with environmental attorneys in resolving state and federal cases.

Mr. Frerichs has been an invited speaker at a wide range of civic and special interest groups - from Kiwanis Clubs to neighborhood groups to the US Army Corps of Engineers.

# The Green Environmental Group, Ltd.

Jessica A. Irwin, Environmental Analyst

#### Education:

Purdue University: B. S., Natural Resources and Environmental Science, 1997 College of DuPage, A. S., Environmental Science, 1996

While at Purdue University, Ms. Irwin majored in Natural Resources and Environmental Science to concentrate in geology, soils, water, atmosphere, and environmental policy. She has acquired a strong technical background through her undergraduate studies by encompassing classes including Environmental Engineering, Geology of Landfills, Liminology, Air, Water, & Soil Contamination, Aquatic Botany, Environmental Soil Science, Environmental Policy Analysis, Ecology, Wildlife Ecology, Global Change Modeling, Atmospheric Science, and Statistics. Her educational experience incorporated lake management plans, water sampling, soil sampling, and landfill monitoring. She graduated in December 1997 completing a Bachelors of Science in three and a half years.

#### **Professional Services:**

Last pg missing

Environmental Internship: Green Environmental Group, Ltd. May 1997-Aug. 1997

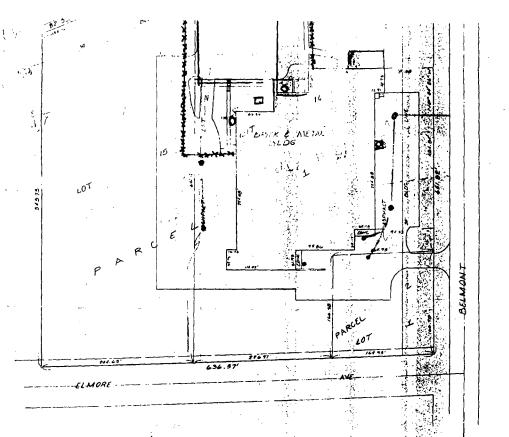

Ms. Irwin started an internship with the Green Environmental Group in May of 1997. She researched, wrote, reviewed and assisted in several Phase I environmental assessments, Phase II, & III soil sampling. She conducted research defining categories of hazardous waste for proper disposal. Ms. Irwin completed several phase I site assessments, assisted in several other site visits, a phase II, a tank removal, and various other projects. Her primary responsibilities were several Phase I site assessments including agricultural, commercial, and industrial land.

Ms. Irwin was hired as a full time employee in January of 1998 after completing her B.S.. She assists in researching and conducting Phase I Assessments and in Phase II soil investigations.

#### Previous Work Experience:

Ms. Irwin worked as an Assistant Manager for the Wild Bird Center and as a Sales Guide for the Nature Company utilizing skills in customer service, inventory control, reordering stock, opening/closing, cashier, training of new employees, knowledge of birds, problem solving, and multi-tasking. While at the Nature Company, she received the highest review for customer service and sales.

#### DOWNERS GROVE SANITARY DISTRICT PROHIBITED MATERIALS DISCHARGE REPORT July 1 through December 31, 2001

Company: MAGNETROL INTERNATIONAL
Location: 5300 Belmont Downers Grove, IL 60515
This Report was completed by: JAMES M. JANI
This Report was completed by: JAMES M. JANI  Title: Stockroom Superison / Environmental Phone: 630-969-4000 ext 366  Coordinator
Describe the occurrence of any discharges of materials prohibited from discharge to the sanitary sewer system. Include the date, time and type of materials discharged; the amount; who was notified at the time; how the spill was contained and cleaned up; and the method of disposal for the spilled materials. Please reference any reports filed with the District.
(Please attach additional sheets)
If no discharges occurred during the reporting period, please indicate that by checking the certification statement below:
Based on my inquiry of the person or persons directly responsible for managing compliance with the accidental discharge reporting requirements, I certify that to the best of my knowledge and belief, no prohibited materials have been dumped or spilled into the wastewaters since filing the last Prohibited Materials Discharge Report. I further certify that this facility is implementing the Spill Containment and Control Plan submitted to the District.
The report must be signed by an authorized agent of the company named above:
Authorized Agent: JAMES M. JANI Title: Stock ROOM Supervisor/ (Please type or print name) ENVIRONMENTAL COORDINATER
Signature: Date: 1/31/02

Dear Mr. Data:

Loren Data

Your facility is included in the Downers Grove Sanitary District's solvent and toxic materials management program, the purpose of which is to prevent the accidental or deliberate discharge of toxic material into the sanitary sewer system and provide assistance in the event of a discharge. Because of the materials in use or storage at your facility you are required to report to the District twice yearly in January and July, filing reports for the previous six month period.

A prohibited materials discharge report form is enclosed for you to complete for the period of January 1 through June 30, 1991. For any discharges, please describe the incident fully, the volume and nature of the material involved, how the material was cleaned up and disposed of and who was notified of the situation. If no discharges occurred during the reporting period, you shall certify that by checking the certification statement.

This would also be an appropriate time to review your spill containment or solvent management plan on file and update it if any procedural changes have been made. If there have been any changes, please contact me so the plan on file with the District can be updated.

The enclosed report must be completed, signed and returned to the District by July 31, 1991. Please feel free to call me if you have any questions regarding these reporting requirements.

Loren Data Emergency Coordinator Magnetrol International 5300 Belmont Road Downers Grove, IL 60515

Dear Mr. Data:

Your facility is included in the "Solvent Management" portion of the Downers Grove Sanitary District's Pretreatment Program because of the potential for discharge of materials which are prohibited from the sanitary sewer system.

Twice each year you are required to report to the District, summarizing the actions taken during and after any spills involving the prohibited materials. A Prohibited Materials Discharge Report Form is enclosed for you to complete for the period of July 1 through December 31, 1988. For any discharges, please describe the incident fully, the volume and nature of the material, how it was cleaned up and disposed of and who was notified. Also describe what actions have been taken to modify procedures to prevent a recurrence. If no discharges occurred during the reporting period, you may certify that by checking the certification statement.

This would also be an appropriate time to review the solvent management plan which was submitted to the District, and compare it to current procedures used in the handling, storing and disposal of prohibited materials. The District should be informed of any changes in writing so that the plan on file with the District can be updated.

The enclosed report must be completed, signed and returned to the Sanitary District by January 31, 1989. Please feel free to call me with any questions you may have regarding these reporting requirements.

Sincerely,

DOWNERS GROVE SANITARY DISTRICT

Magnetrol International, Inc. 5300 Belmont
Downers Grove, IL 60515

Attn: Loren Data, Emergency Coordinator

Gentlemen:

Your facility is included in the "solvent management" portion of the Downers Grove Sanitary District's Pretreatment Program because of the potential for discharge of materials which are prohibited from the sanitary sewer system.

Semi-annually you are required to submit a report to the District summarizing what actions were taken during and after any discharge incidents involving prohibited materials. The report should include a description of what actions were taken to notify the District, and other authorities, how the material was cleaned up and disposed of, and most importantly, what has been done to revise your procedures or facilties to prevent a recurrence.

If no prohibited materials were discharged during the reporting period, you may certify that fact by checking the certification statement.

This would also be an appropriate time for you to review the solvent management plan which was submitted to the District, and compare it to current procedures. The District should be informed of any changes so that the plan on file can be updated.

The "Prohibited Materials Discharge Report" form which is enclosed should be completed, signed, and returned to the District office at the address above no later than January 31, 1986.

Please feel free to call me if you have any questions regarding the reporting requirements.

Sincerely,

DOWNERS GROVE SANITARY DISTRICT

Janet M. Lacina Laboratory Services Director Downers Grove Sanitary District 2710 Curtiss Street, P.O. Box 1412 Downers Grove, Il. 60515

Dear Ms. Lacina:

Per are discussion on 4/10/90 I would like to update your department of the fact that Trichloroethylene is no longer used at Magnetrol. We considered it are greatest risk, both in the hazards of the product coupled with the volume stored. As you now are aware, are degreasing process is done with an alkaline base, water wash system. I will be following up this letter in a couple of weeks with a new chemical inventory currently used at Magnetrol.

Thank you for your assistance today and I hope the results will be favorable.

Sincerely, Loren L. Da

1.

.

- 5. What is the name of your regular refuse hauler? ROTS
- 6. Has your facility submitted a spill containment or emergency response plan to the District?

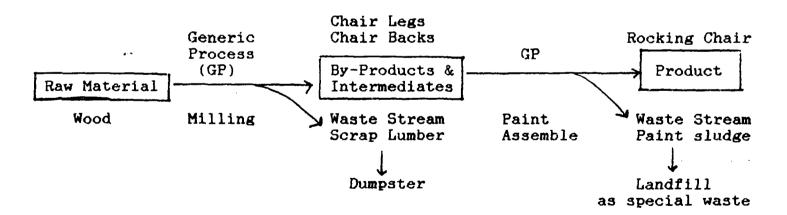

If yes, please submit any changes to this plan. If no plan has been submitted, and one is required for your facility, we will send you a checklist for this activity.

#### SECTION VI MISCELLANEOUS INFORMATION

1. Other Permit Information

2. Process Flow Schematic

Please attach a flow chart of your major production process or service procedures, including the raw materials, products and wastestreams generated. The following is an example:

Raw materials may include feedstock, purchased materials which you further assemble, repackage, fabricate with, etc.

Generic processes may include chemical reactions by generic name, finishing operations, printing, packaging, assembly, etc.

Waste streams should include discharges to air, waterways, sanitary sewers, solid waste and re-use or recycled materials.

## Responses to Request to Schaub (c/o Magnetrol)

# ATTACHMENT B Requests

#### General Response:

The "Request for Information Pursuant to Section 104 of CERCLA for the Downers Grove Groundwater Site in Downers Grove, DuPage County, Illinois" was addressed to Schaub Engineering, c/o Magnatrol International." Magnetrol International, Incorporated (please note correct spelling of company name) purchased the assets of The Schaub Corporation on February 21, 1978. Magnetrol is not the successor to Schaub. However, in the spirit of cooperation, Magnetrol has provided the limited information it has which is responsive to the requests to Schaub. The providing of this information is no way an indication that Magnetrol is a successor to Schaub, or that Magnetrol is responsible or liable for Schaub, and is not a waiver of any claim on that issue. Because this response is limited to responses based on Magnetrol's knowledge of Schaub's operations, the responses are limited in time, up to 1978, and include no information after that date.

#### Response to Question No. 1:

Joseph R. Fiedler, Richard Lamz, Loren Data and Harry Klimek are Magnetrol employees who were consulted in the preparation of the answers to the information requested. They are located at 5300 Belmont Road, Downers Grove, Illinois 60515. Phone: 630-969-4000. Additionally, Magnetrol consulted with its attorneys in the preparation of these responses. Any contact with Magnetrol or its employees in the future should be coordinated through Michael J. Maher or Elizabeth S. Harvey, Swanson, Martin & Bell, One IBM Plaza, Suite 2900, 330 North Wabash Avenue, Chicago, IL 60611. Phone: 312-321-9100.

#### Response to Question No. 2:

Plat of Survey showing location of sewers, utilities, additions, and tanks. Blueprints/architectural drawings.

#### Response to Question No. 3:

We do not believe there is anyone alive today who could provide additional responses or documents.

#### Response to Question No. 4:

Joseph R. Fiedler, Loren Data, Richard Lamz, and Harry Klimek (Magnetrol employees) are aware that Schaub used chlorinated solvents at the Schaub facility. They have no further knowledge regarding purchase, use, or disposal of hazardous substances or materials at the facility.

#### Response to Question No. 5:

Schaub Corporation operated at 5300 Belmont Road, Downers Grove, Illinois, in the Ellsworth Industrial Park. To the best of Magnetrol's knowledge, Schaub had no operations at any other location in Ellsworth Industrial Park.

1 :

Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Beyond that awareness, Magnetrol has no knowledge regarding the questions in Request No. 5, as to Schaub's use, purchase, storage, treatment, disposal, transport or other handling of hazardous substances or materials.

#### Response to Question No. 6:

Schaub produced boiler feed pumps and deaerators at its facility. Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Beyond that awareness, Magnetrol has no knowledge of Schaub's use, purchase, storage, treatment, disposal, transport or other handling of hazardous substances or materials.

#### Response to Question No. 7:

Magnetrol is aware that Schaub moved into its facility at 5300 Belmont Road, Downers Grove, Illinois, in 1961, and that Schaub owned the property until 1978. Magnetrol has no further knowledge regarding Schaub's ownership and operation of the property, and has no documents relating to Schaub's ownership and operation of the property.

#### Response to Question No. 8:

Schaub owned and operated the facility from 1961 to 1978. The building which is presently on the site existed from 1961, with some additions over the years, and with an addition added by Magnetrol in 1988-89 (after Magnetrol purchased the facility from Schaub). Magnetrol has no specific information regarding the location of underground utilities, or storm water drainage and sanitary sewer systems during Schaub's ownership and operation of facilities at the Site. However, Magnetrol believes that these conditions were basically similar to the current conditions. Thus, Magnetrol has provided a Plat of Survey and Architectural Drawings.

#### Response to Question No. 9:

Magnetrol has no specific information regarding solid waste units at Schaub's facility from 1961 – 1978. However, Magnetrol does not believe that Schaub had any waste piles, landfills, surface impoundments, or waste ponds or pits. When Magnetrol purchased Schaub's assets in 1978, there were two underground storage tanks for heating oil on the property. Those tanks were removed by Magnetrol in 1987, under the supervision of the Downers Grove Fire Department. (The location of the tanks is shown on the Plat of Survey.) Additionally, when Magnetrol purchased Schaub's assets in 1978, there was a below ground storage tank for propane. That tank no longer contains propane, and has been capped and is inactive.

#### Response to Question No. 10:

Magnetrol has no information regarding the prior owners of the property prior to Schaub's construction of the facility in 1961. To the best of Magnetrol's knowledge, the property was a horse pasture before Schaub constructed the facility in 1961.

#### Response to Ouestion No. 11:

See response to No. 10, above. Magnetrol has no knowledge regarding operators at the property prior to 1961.

1 .

#### Response to Question No. 12:

Magnetrol has no knowledge regarding any permit held by Schaub.

#### Response to Question No. 13:

Magnetrol has no knowledge as to whether Schaub ever had "interim status" under RCRA.

#### Response to Question No. 14:

Magnetrol has no knowledge as to whether Schaub ever filed a notification of hazardous waste activity under RCRA.

#### Response to Question No. 15:

Magnetrol is not aware of any such reports, data, or information relating to the Site during Schaub's ownership and operation of the Site.

#### Response to Question No. 16:

Magnetrol is not aware of any leaks, spills, or releases into the environment during Schaub's ownership and operation of the Site.

#### Response to Question No. 17:

Magnetrol is not aware of any spill, leak, release or discharge of hazardous materials into any subsurface disposal system or floor drain during Schaub's ownership and operation of the Site.

#### **Response to Question 18:**

Magnetrol is not aware of any spill, leak, or release of hazardous materials during Schaub's ownership and operation of the Site.

#### Response to Question 19:

Magnetrol is not aware of any excavation or removal of soil from the Site during Schaub's ownership and operation of the Site, except as may have occurred during the construction of, and additions to, the facility. Magnetrol has no information responsive to the remainder of this request.

#### Response to Question 20:

Magnetrol has no such records from Schaub.

#### Response to Question 21:

Magnetrol has no such records from Schaub.

#### **Response to Question 22:**

Magnetrol has no knowledge whether Schaub conducted any Phase I or Phase II investigations on the property.

#### Response to Question 23:

Magnetrol has no knowledge regarding monitoring wells, which may or may not have been on the property during Schaub's ownership and operation of the Site.

1 %

#### **Response to Question 24:**

Magnetrol has no knowledge regarding soil borings, which may or may not have been collected while the property was owned by Schaub.

#### Response to Question 25:

See response to Request No. 9, above.

#### Response to Question 26:

Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Magnetrol has no knowledge regarding Schaub's solvent management system.

#### Response to Question 27:

Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Magnetrol has no knowledge regarding Schaub's waste solvent handling and disposal practices.

#### **Response to Question 28:**

Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Magnetrol has no knowledge regarding Schaub's solvent suppliers.

#### Response to Question 29:

Magnetrol is aware that Schaub used chlorinated solvents for cleaning in its production process. Magnetrol has no knowledge regarding Schaub's waste solvent handlers.

#### **Response to Question 30:**

See response to Request No. 8, above. See attached Plat of Survey and architectural drawings.

#### Response to Question 31:

Magnetrol has no documents regarding correspondence between Schaub and units of local government regarding discharges into St. Joseph Creek and the municipal sewer.

#### **Response to Question 32:**

Magnetrol has no knowledge regarding floor drains at the facility during Schaub's ownership and operation of the facility.

Re: Downers Grove Groundwater Investigation Site

Response to Attachment B Information Requests

1. The following individuals were consulted in the preparation of this document.

Ralph Grandle
President
Tricon Industries
Home address:

John (Jay) Winkler Vice President Tricon Industries Home address:

Larry McDaniel
Plant Manger
Tricon Industries
Home address:

Rich Schmitt
Maintenance Supervisor
Tricon Industries
Home address:

Len Lucchesi Materials Manager Tricon Industries

Home address:

John Cieplak
Director of Manufacturing
Tricon Industries

Home address:

Frank Mroczka
Plating/Finishing Supervisor
Tricon Industries

Home Address:

- 2. The following documents were consulted and are enclosed as part of this response.
  - A. Phase I & II Environmental assessment
  - B. Downers Grove Sanitary District Quarterly Reports
  - C. Downers Grove Sanitary District correspondence
  - D. Downers Grove Sanitary District Wastewater permits.
  - E. Solvent manifests 1983 to present
  - F. Form "R" and correspondence for reporting years
  - G. Drawings
    - 1. Finishing department layout and floor drain plan
    - 2. Piping floor plan, new addition
    - 3. Plumbing plan for original structure (sheets 28 & 29)
  - H. Environmental work instructions
    - 1. Spill Contingency Work Instruction
    - 2. Waste Management Work Instruction
    - 3. Wastewater Work Instruction
    - 4. Vapor Degreaser Work Instruction
    - 5. NESHAP Work Instuction
- 3. N/A
- 4. Yes, Phase I & II Environmental assessments. (See item #2)
- 5. There are no monitoring wells on this property.
- 6. Yes (See items #4 & #2 Phase I & II Environmental assessment)

- 7. No storage tanks in any form have ever existed on this property.
- 8. Prior to 1980 the solvent management plan consisted of one (1) Phillips Vapor Degreaser which used Perchloroethylene.

Perchloroethylene has always been purchased in 55 gallon drum quantities. Storage capacity has been limited to two (2) drums new solvent and two (2) or three (3) drums used solvent.

Disposal of used solvent consisted of recycling or fuel blending, off site by supplier or waste disposal company.

All solvent was maintained indoors in an area absent of floor drains.

1,1,1 Trichloroethane was used as a cold batch degreaser in small quantities. Two
(2) to three (3) drums of new and used were maximum quantities on hand.

The use of 1,1,1 was discontinued in 1988.

- 9. See item #8
- 10. 1963 1993

Parco Products (no records are available as to quantities purchased) 3240 S. Kolin Ave. Chicago, IL. 60623

1994 – present Finishing Equipment Inc. 1120-E Republic Dr. Addison, IL. 60101 86 drums – 4,730 gallons purchased

11. Waste solvent handlers:

1963 to 1983

American Chemical Service

Griffith, IND. 46319

US EPA # IND016360265
No records are available as to quantities shipped prior to 1983.

1983 to 1990

American Chemical Service

64 drums, 3,520 gallons

Griffith, IND, 46319

US EPA # IND016360265

1990 to 1992

Avganic Ind.

15 drums, 825 gallons

114 N. Main

Cottage Grove WI 53527 US EPA # WIJ000808824

1993 to 1999

Hydrite Chemical Co.

42 drums, 2,310 gallons

114 North Main St.

Cottage Grove, Wl. 53527 US EPA #WID000808824

2000

Detrix Corp.

4 drums, 220 gallons

2537 Lemoyne Ave. Melrose Park, IL. 60160 US EPA #ILD074424938

2000 to present

Heritage – Crystal Clean LLC

7 drums, 385 gallons

15330 Canal Bank Road

Lemont. IL. 60439

US EPA # INR000006536

- 12. Drawings enclosed (see item #2)
- 13. All available correspondence between Downers Grove Sanitary District and Tricon Industries are enclosed. (see item #2)
- 14. All floor drains in the cleaning department empty into the wastewater treatment pit. (See department layout drawing). Floor drains in the area of the vapor degreaser are plugged to contain a spill of solvent should one occur. Floor drains throughout the rest of the building are located in washrooms or janitors closets. (see enclosed piping plans.)
- 15. Plating / Finishing supervisors:

1963 – 1970 Helmar Berg (Deceased) Chicago, IL.

16. Reports for required reporting years are enclosed. (see item #2)

#### Conclusion:

All solvents from inception to present have always been handled conscientiously not only from an environmental perspective but also as an economical standard. There has been little to no turnover (39 years) in the direct supervision of the Cleaning department, which controls all solvent usage. Employees of the Cleaning department are certified class "K" wastewater treatment works operators as is the Plant Manager and are fully versed in handling, storage and use of solvents.
